Post Cost Advances via a Spreadsheet Import

When a client sends a spreadsheet of cost advances, it is possible to import those and batch post as deposits, transaction 11.

The spreadsheet must have the following minimum information:

- Client account number (Custfile)
- Network account number (NCustfile)
- Forwarding account number (FCustfile)

Optionally, it can also match by the **Ourfile** number. It is not needed in the spreadsheet; however, the column titled **Ourfile** must be there.

Paydate – date that it will be credited / trx deposit date

Check number – Check number from the client for the advance

Amount – amount of the cash advance

Ourfile -can be left blank if matching by any other number

Custid – can be left blank, it will populate when matching

Save the spreadsheet from the client, usually in Q-Law/payment/advcost (any additional columns should be deleted or moved to the column after the Custid). The spreadsheet should be saved as a Microsoft Workbook 5.0/95.

Process the Spreadsheet into Batch Posting

Bookkeeping

Import advances

1. Click on the button to first chose the dbf: ADVIMPORT

	Complete X
	Advance matching complete - Matching advances found # 4
Processing record: 4	OK

4. If so desired, print the exception (if any) and / or matched items.

Note: If a client assigns numerous files with the same identification numbers, as medical providers sometimes do, when Q-Law matches, using that number, it will match it and post to the earliest opened Ourfile that has that client number.

In the case of companion files, it would usually be the Main file. The deposit can then be manually moved should it be for a different companion file.

Deposits will not be posted to files in a closed status and will appear on the exception report.

5. Post the matched payments to Ourfile.

Post 4 Cost Advances (11) of 2750.00 into case files? <mark>If poste</mark> by mistake, must be deleted from each file.	ed.
Yes No	

Transfer to files completed	Х
4 advances were transferred to files in the amount of: 2750.00 Batch# assigned: 1013	
ОК	

There is not an undo function when importing in batch. If the payment needs to be removed or reversed for any reason, it must be done in the case trust of each file.

The deposit slips can be balanced to the Approved logs. The exceptions would have to be manually posted. Examples of exceptions would be (no matching Custfile, closed file, etc.,) Once the issues are corrected, they can be placed on a new spreadsheet and imported or added manually.
