Products to Install

- WordPerfect
 - Avoid the bloat, only install the WordPerfect Word Processor
 - Think of it as Merge Tool.
- Don't install the other products
 - Most firms will also install the Microsoft Suite for other productivity tools.

Letterhead

- f:\clsinc\word\ LHEAD.60
 - Example: LHEADCLS-v2.wpd
 - Called by Standoc1.x7
- f:\clsinc\word\ PLEADING.60
 - Called by Standoc2.x7
- f:\clsinc\word\PDF-SUIT.90
 - Called by PDF-DOC.90
- Custom Form Setup 1-S-6
 - Define various mail merge destinations

Mergedat

- After merging a document, a copy of the merge data is stored.
- N:\users\luis.Gomez\mergedat & Pleaddat
- Quick Entry
 - You will be asked for the # of fields.
 - Any answer is fine, pick 999
 - You can review the merge data, can help you to see what the actual values look like.

Inserting a Field Code

- Insert Field Code
 - Must be a Merge Document
 - Select No Association to field codes
- Macro CMField
 - Simple Macro asks for a field # and inserts the field.
- Copy existing Field Code and change the #
- ?
 - Adding a ? After the field # will instruct WordPerfect to “Remove the line” if the field code is blank.

Field Code Documentation

- Collection-Master Manual
 - Field Codes
 - Field Codes Numerical List
 - Field Codes Type
 - Field Code Maps
 - Help Window in Collection-Master

Conditional Statements

- IF(expr)
 - F:\CLSINC\WORD
 - Use “Quotes”
 - Remember Conditionals are comparing Strings
 - Math is easier performed in Formulas & FNScripts
- IFBLANK(field)
- IFNOTBLANK(field)

NestForm

- Include another document in the document.
- Sample Cases
 - Add letter head in the middle of the document
 - Use PS fields to insert document: FNestFrm.frm
- OnError
 - The danger of NestForm is the merge will fail if the document doesn't exist.
 - OnError may be used to trap for problem with the mail merge.

D-Multi

- f:\clsinc\word\Dmulti
 - Sample Form using “Report File” fields
- f:\clsinc\word\Dmultic.frm
 - Sample Form using “Companionated Claims” fields
- Multi-Line Fields work well in a Grid.
 - Create a cell for each field.
 - Fields have CRLF at the end.
 - Itemized fields have count / totals equivalents.

Conditional Page Breaks

- Format – Keep Text Together
 - WindowOrphan
 - Prevents the 1st and last lines of a paragraph from being separated across pages.
 - Protects the entire page, easy to implement and automatic.
 - A Paragraph is defined as a Carriage Return separated entry. Multiple lines are not treated as a paragraph.
 - Keep selected text together on same page.
 - Highlight a section, a “Block Protect” a section of the document.
 - All the lines are treated as a “Single Block” and will carry over to the next page together.

Advanced Concepts – Merge Pool

- Allow one user to gather and merge claims for other users.
- Enable in 1-S-4-9
- Users request documents as usual.
- When ready to have their documents
 - Send WP to Merge Pool

Advanced Concepts – Power Merge

- F:\CLSINC\BATCH\POWERMERGE.CMD
- Significantly enhance Mail Merge Performance
- Reduce conflicts due to file sharing
- Insulate user from original form documents

Advanced Concepts – Client Folder

- Create folder under WORD
- F:\clsinc\Word\Clients\
 - Forwarder #
 - Sort Code
 - EDI Type
- If the Folder exists use the version from the folder

Advanced Concept – System Resources

- Minimum of Dual Core CPU
 - If you are multitasking, additional CPU's will help!
 - Four CPU's will likely improve performance.
- Minimum of 16 GB of Memory
 - WordPerfect is a 32bit Application.
 - Up to 2GB of memory will be used by the application
 - The remaining memory will be used by other components
 - Hard Disk Cache
 - Printing
 - vMedia FTI

Advanced Concept – FTV

- File to vMedia (FTV)
- Add comment to document to populate vMedia Metadata
- vMedia also supports exporting individual PDF files during the merge.

Advanced Concept – Bar Codes

- vMedia supports 3 of 9 as well as 2D barcodes
- 2D Barcode:
 - See dbar.FRM
 - NestForm
 - F:\IMASTER\MODULES\BARCODE\INSDMBARCODE.WCM
 - Assign pDMBarcode;"~?IM~fileno=/~llcode=/"
